

Living Collections and Horticulture

Michael DeMotta,
Curator of Living
Collections

2018 Catalog

Prepared by Kevin Houck, Plant Records Manager

The Living Collections

The major collections of the National Tropical Botanical Garden are the Economic, Synoptic, Conservation and Historical Landscape Collections. This includes over 80,000 actively curated plants within the boundaries of our Gardens and Preserves. An additional 30,000 plants are recorded in our databases as restoration and groundcover or agricultural display plantouts. A total of 117,332 plants are included in this 2018 catalog.

In 1990, a printed catalog of the entire National Tropical Botanical Garden Living Collection was created by Scott Lucas. In 2015, Kava Vale printed and updated a catalog for the McBryde Garden followed by a 2017 all NTBG update. This update includes Collection Statistics, followed by a taxa list organized by plant family, plant name, garden location, accession number(s) and quantity of plants currently in inventory at NTBG. Over 500 Photographs were compiled out of NTBG Resource Space, the NTBG Collector System, and from individual contributors. Additionally, a handful of photos are sourced from Creative Commons (CC). Photos from The Collector System include accession numbers when available.

We would like to acknowledge the assistance of the NTBG staff, volunteers, donors and colleagues in the production of this 2018 Catalog. We hope that this will serve as a valuable resource for the continued growth and development of NTBG's major Living Collections, and assist in our collaborative conservation efforts with our partners.

April 1, 2018

Michael DeMotta, Curator

Kevin Houck, Plant Records Manager

Major Collections of the National Tropical Botanical Garden
Economic (Ethnobotanical) Collections
Tropical Fruit
Spices and Perfume Plants
Medicinal Plants
Polynesian Canoe Plants
<i>Pandanus spp.</i>
<i>Piper methysticum</i>
<i>Musa spp. and Artocarpus spp.</i>
<i>Colocasia esculenta</i>
Synoptic Collections
Geographic Groups
<i>Pacific: Polynesia, Micronesia, Melanesia</i>
<i>Mascarene</i>
<i>Indonesian</i>
Taxonomic Groups
<i>Arecaceae</i>
<i>Rubiaceae</i>
<i>Zingiberales</i>
<i>Erythrina</i>
<i>Orchidaceae</i>
<i>Araceae</i>
Conservation Collections
<i>Artocarpus altilis</i>
<i>Pelogodoxa spp.</i>
<i>Pritchardia spp.</i>
Native Hawaiian
<i>Federally listed Threatened and Endangered</i>
<i>Plant Extinction Prevention Program listed</i>
<i>Center for Plant Conservation listed</i>
<i>Restoration endemic/indigenous plants</i>
Historical Landscape Collections
Allerton Garden
Kahanu Garden
Kampong Garden
Limahuli Garden

Monocots	37	294	667	1,106	2,497	33,586
Pteridophytes	19	40	62	77	161	17,848
Totals	190	1,000	1,923	3,021	7,720	116,741

Species' counts the number of unique specific epithets. 'Taxa' counts the number of unique combinations of species, subspecies, varieties, cultivars and hybrids. An 'accession' represents one or more plants collected from a single source at a single time and as one propagule type (seed, cutting, plant, etc.) The numbers here do not include seeds or plants in the nursery, only currently living plants in NTBG Gardens.

Major Collections

Collection	Genera	Species	Taxa	Accessions	Plants
