NREM691-601 - Advanced Topics in Natural Resources and Environmental Management:

Botanical Conservation Collections - From Discovery to Restoration

Summer Session I, 2023 (May 22 – June 30)
3 credits, online course

Join a virtual expedition to discover and describe Hawaiian and Pacific Flora, documenting, managing, and caring for herbarium and living collections, and their use to inform conservation planning, and restore endangered species.

This course is taught by professional staff from the National Tropical Botanical Garden (ntbg.org), who are engaged in strategic, scientific and practical aspects of building, managing and using botanical conservation collections. June 5-9 will be in person on Kaua'i.

Counts towards EECB Conservation requirement
